	Examiner Willmon Fridie	Art Unit 3722	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-21 are rejected under the judicially created doctrine of double patenting over claims 1-26 of U. S. Patent No. 6733213 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: A cutting tool comprising: a blade having a front insert retaining portion and a rear body and two cutting inserts mounted therein, defining a front to rear longitudinal direction (A), a right side and a left side extend between an upper side and a lower side, the right side and the left side facing opposing directions, the opposing directions being transverse to the front to rear longitudinal direction; the insert retaining portion having a right side face and an oppositely directed left side face and comprising an upper insert receiving pocket, upwardly located with respect to a

Art Unit: 3722

lower insert receiving pocket, and a rearwardly extending recess between the upper and lower insert receiving pockets; each one of the two insert receiving pockets comprises a rear wall, transversely directed to the longitudinal direction (A) and substantially perpendicular to the right and left side faces, a lower wall adjacent to the rear wall and substantially perpendicular to the right and left side faces, a side wall that is substantially perpendicular to the rear and lower walls, and, a threaded bore extending from the side wall to an adjacent of the right and left side faces, the side wall of one of the two insert receiving pockets faces generally in the same direction as the right side of the blade and the side wall of the other of the two insert receiving pockets faces generally in the same direction as the left side of the blade; each one of the two cutting inserts has a top surface, a bottom surface and a side surface connecting the top and bottom surfaces, at least one cutting edge extends on the side surface substantially between the top and bottom surfaces, a through bore extends between the top and bottom surfaces; each one of the two cutting inserts is located within a different one of the insert receiving pockets such that the insert bottom surface abuts the side wall of the insert receiving pocket and the cutting insert is retained by a clamping screw that passes through the through bore and threadingly engages the threaded bore. Specifically, wherein a distance (W) between the right and left side faces of the body portion is substantially smaller than a height dimension (H1) between the top and bottom faces.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of

Art Unit: 3722

the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Allowable Subject Matter

Claims 22-24 are allowed.
